**Thank you for voting for expanded stem cell research.
More hope • More cures • *More life***

More hope • More cures • *More life*

Deb Pryce Fought for Expanded Stem Cell Research

Congresswoman Deb Pryce voted for the House legislation to expand embryonic stem cell research. Scientists agree stem cell research holds great promise at creating new therapies and cures for cancer, heart disease, diabetes, Parkinson's, Alzheimer's, multiple sclerosis and spinal cord injuries.

Congresswoman Pryce voted to enhance this groundbreaking research – and that will lead to more hope, more cures...more life.

Congresswoman Pryce: Forging a Brighter Future for Ohio's Families

Please call Congresswoman Pryce at 614-469-5614 and thank her for caring about our future.
